---

No information on when/where just yet..... I'm sure it will vary by location.... Many Parishes, as you may know, haven't begun any debris collection yet.... I will let you know more once details start coming together.

Mike,  
Do you happen to know when the "one pass" commercial debris pickup is scheduled and where?

**Subject:** RE: U.S. EPA SITREP UPDATE 8-28-16

The Army Corps puts out their bullet points from the Debris Task Force meeting usually by mid-afternoon the next day.... Not sure if you are on that mailing list but, I will make sure you get them.

For now, the major points from yesterday were:

- Commercial debris will be picked up but, only one pass will be made (i.e., get it ALL out to the curb in one push because they won't be coming back to pick up from commercial establishments again).
- For Private HOAs (gated and non-gated communities) as well as Churches it was decided they will be eligible for debris pick up like all other residents.
- "Clearly Commercial" facilities (i.e., big box stores like Home Depot, Lowe's, Walmart, etc) will have to handle their debris on their own.
- Army Corps is working on an updated debris size estimate and should be ready by Monday or Tuesday next week.
- Any haulers arriving at C&D landfills that have "black bags" (non-C&D waste inside dark garbage bags) will be required to open up the bags and remove any non-C&D material and take that material to the correct landfill.... Nothing other C&D waste may go into a C&D landfill... no exceptions.

Hope this helps....Just let me know if you have any questions or concerns....

Hi, Mike!

How often are the Debris TF meetings?

**US. EPA SITREP 8-28-16**

- LDEQ continues to conduct phone and ground assessments of WWTPs.
- LDHH continues conducting drinking water system assessments.
- EPA and LDEQ are participating in the Debris Task Force along with USACE, DOTD, and USDA.
- EPA and LDEQ are participating in the Critical Infrastructure Task Force along with USACE, DOTD, and USDA.
- EPA continues to provide oversight of the responsible party-led cleanup at the Lard Oil spill which impacts a residential neighborhood in Denham Springs. Where access has been granted, the Responsible Party is now removing oil-stained vegetation and has started surface excavation of oil-contaminated surface soils. Air sampling activities are also being conducted on the facility and around the perimeter of the "impact" area of the oil release.
- EPA is working with LDEQ to ensure that there is adequate emergency response coverage relating to oil and hazardous material incidents in the impacted area.
